

Southwestern France

LANDES FOREST OF WESTERN EUROPE

REASON FOR PLANTING

PROJECT HIGHLIGHTS:

- March 2018 planting timeline
- 30,000 trees funded by Enterprise
- 2018 is the 3rd year of tree planting in France
- 120,000 total trees planted in France through our partnership

Continuing to build off momentum of the restoration work of 2016 and 2017, Enterprise is again supporting one of the largest forests in Western Europe. The project will reinforce species diversity by planting deciduous and evergreen trees.
