

Pike National Forest

SOUTH PLATTE RANGER DISTRICT, COLORADO

REASON FOR PLANTING

PROJECT HIGHLIGHTS:

- April 2018 planting timeline
- 25,000 trees funded by Enterprise
- Continued support for reforestation efforts that rely on partnership dollars to sustain the restoration program
- 7th year working on Pike National Forest, providing more than 400,000 trees to date in Colorado

Multiple wildfires over the last 15 years have created a large need for reforestation. The goal continues to be reestablishment of forest cover; improving watershed health; and promoting endangered, threatened, and sensitive plant and species habitat.
