

Sandhills Game Lands

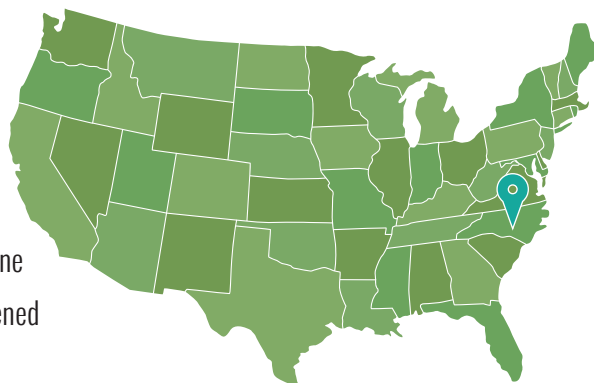

FAYETTEVILLE, NORTH CAROLINA

REASON FOR PLANTING

PROJECT HIGHLIGHTS:

- December 2017 - January 2018 planting timeline
- 35,000 trees to help restore the area's threatened longleaf pine ecosystem
- 1st year planting in North Carolina
- Long-term goal of providing habitat for the endangered red-cockaded woodpecker

The longleaf pine ecosystem is one of the most threatened ecosystems in the country. This planting project will help to bolster the longleaf pine presence in North Carolina and create habitat for the endangered red-cockaded woodpecker as well as cover and browse needed by other area wildlife.
