REASON FOR PLANTING

PROJECT HIGHLIGHTS:

- Early spring and winter 2018 planting timeline
- 50,000 trees funded by Enterprise
- 2018 is the 11th year Enterprise has planted trees in the UK
- More than 850,000 trees planted to date in the UK

In partnership with the Arbor Day Foundation and Woodland Trust, Enterprise is helping to create new woodlands in one of the least-forested areas of Europe. These plantings will provide tree cover on barren sites, stabilize river banks, lower river water temperatures, and improve biodiversity.
