

Tahoe National Forest

SACRAMENTO, CALIFORNIA

REASON FOR PLANTING

PROJECT HIGHLIGHTS:

- April 2018 planting timeline
- 70,000 trees funded by Enterprise
- 12th year working on a California restoration project
- More than 2.3 million trees planted in the state of California through our partnership

In the wake of the catastrophic American Fire that raged through the forest in 2013, Tahoe National Forest is on a long road to recovery. This replanting project will help to restore the landscape, protect area watersheds, and reestablish lost wildlife habitat.
