

PROJECT HIGHLIGHTS

Fall–Winter

2019 planting timeline

4,000

trees funded by Enterprise

4th year

of tree planting in Spain

Total of 28,000

trees planted in Spain through
our partnership

PROJECT PROFILE: 2019

Spain

REASON FOR PLANTING

Spanning 18.4 million hectares, the Spanish forest is the fourth largest forest area in Europe. Invaluable in every way, it is highly beneficial to its environment: preserving local biodiversity, filtering water, preventing soil erosion, and more. However, diseases, fires, and storms have taken their toll on Spanish forestland. With the help of Enterprise, replanting efforts can continue.

Replanting forest
areas affected by
diseases, fires,
and storms

Helping the
Spanish landscape
adapt to climate
change

Protecting
the land from
soil erosion
