

# Landes Forest

Southwestern France

## BY THE NUMBERS

**59**  
acres  
replanted  
this year

**30,000**

trees planted this year

Tree species planted:  
silver birch, cluster pine,  
and holly oak

crew of **4** people

window  
of days  
to plant

## REASON FOR PLANTING

- Restoring forest lands significantly impacted by storm damage
- Providing flood and erosion control
- Reestablishing a forest that supports the local economy

“

The main aim of this plantation was the renovation of damaged stands by the Klaus storm. Local owners needed help to plant again and restored this forest. Wildlife will come back soon and prosper. The soil will finally be covered again, and that will allow the restriction of erosion.
