

PROJECT HIGHLIGHTS

January

2020 planting timeline

200,000

trees funded by Enterprise

9th year

planting in the state of Florida

**Nearly
2 million**

trees planted in the state
of Florida since 2012

PROJECT PROFILE: 2020

Econfina Creek Watershed Management Area, Florida

REASON FOR PLANTING

Working alongside the Northwest Florida Water Management District, we are planting longleaf pine to protect critical water resources. The goal is to restore and preserve a primary source of drinking water while reestablishing native tree species and improving habitat for area wildlife.

Restoring and preserving the primary source of drinking water for Bay County, Florida

Replanting native tree species to return this area to its natural state

Improving habitat for area wildlife including deer, bobwhite quail, Sherman's fox squirrels, and gopher tortoises
