Throughout

2021 planting timeline

25,000

trees funded by Enterprise
this year

6th year

planting in France

Nearly 200,000

trees planted in France
through our partnership

PROJECT PROFILE: 2021

France

REASON FOR PLANTING

While France currently has the fourth – largest forested area in Europe, it is experiencing an annual decline of 80 million trees planted compared to the 1990s. This is a sign of aging and lack of renewal. In order to meet the challenges of climate change, natural disasters, and disease, reforestation is imperative. Working with partner ReforestAction, we will help to ensure a resilient tree cover that provides a full range of ecological services.
