

PROJECT HIGHLIGHTS

**January**  
2020 planting timeline

**40,000**  
trees funded by Enterprise

**1<sup>st</sup> year**  
working on a Louisiana  
restoration project

PROJECT PROFILE: 2020

# Kisatchie National Forest, Louisiana

## REASON FOR PLANTING

Several centuries of harvesting, land use change, and disease and pests have greatly reduced the forest canopy provided by both longleaf and shortleaf pine. Reestablishing these pine stands within Kisatchie National Forest is critical for the ongoing health of the forest.

Restoring longleaf and shortleaf pine back to historical levels throughout its native range

Improving area watershed health and wildlife habitat

Increasing resiliency for future stresses and disturbances
