

## PROJECT HIGHLIGHTS

# Spring

2020 planting timeline

# 50,000

trees funded by Enterprise

# 2020

is the 15th year of  
tree planting in Canada

# Nearly 1 million

trees planted in Canada  
through our partnership

## PROJECT PROFILE: 2020

# Manitoba Wildlife Federation Planting – Oak River, Manitoba

## REASON FOR PLANTING

The Acadian Forest is one of the most ecologically diverse forests in Canada – and the most endangered. The nearby Petitcodiac River is also in a critical state, with poor water quality due to land use, industrial development, and past mining operations. Tree planting is critical in this area to restore forestland and provide important wildlife habitat as well improved watershed health.

Reestablishing  
forest cover  
throughout the  
Acadian Forest

Improving  
watershed health  
and water quality of  
Petitcodiac River

Enhancing habitat  
for both land and  
aquatic wildlife
