

PROJECT HIGHLIGHTS

April–May

2020 planting timeline

100,000

trees funded by Enterprise

10th year

providing habitat
for the Kirtland's warbler

Approximately 2 million

trees planted in the
state of Michigan

PROJECT PROFILE: 2020

Michigan State Lands

REASON FOR PLANTING

Together with the Michigan Department of Natural Resources, we are striving to replant several of Michigan's state forests on a large scale. This project will replant native tree species to return this area to its natural state and improve area watershed health. The pine forests will grow to provide habitat for the Kirtland's warbler as well as many other wildlife species.

Reestablishing
critical habitat
for the Kirtland's
warbler

Replanting native
tree species to
return this area to
its natural state

Stabilizing soils in
this region to help
prevent erosion
